CommonGround

Business Model Canvas

A one-page view of how CommonGround creates, delivers and captures value.

Business Name: CommonGround **Date:** 10 Oct 2026

Prepared By: CommonGround Team **Version:** Food-only MVP · V3

Key Partners

Who helps us deliver value?

- Ad network (e.g. Google AdSense)
- Map & place-data providers
- BINUS student organisations
- Campus & Festival organisers

Partners bring reach & data.

Key Activities

What must we do well?

- Build the 7-screen decision flow
- Filter > score > fairness > Top 3
- Verify 30–50 venues near campus
- Run the 10-group pilot

Key Resources

What do we need?

- Rules-based matching engine
- Verified venue database
- Product team
- Traffic from shared room links

Value Propositions

Why do groups choose us?

- Fair: hard limits first, nobody below 60
- Private: nobody sees your limits
- Fast: one link, no sign-up
- Advertisers: brand-safe 18–25 audience

“Satu link. Semua jawab. Tiga pilihan pas.”

Kumpulkan preferensi tanpa debat.

Customer Relationships

How do we keep users?

- Self-service, no sign-up
- Automated timer, Top 3 & veto
- In-app feedback & venue flags
- Campus student communities

Channels

How do we reach users?

- Room links: WhatsApp, LINE, Discord
- Campus QR codes & Festival demo
- Social media
- Every room brings 3–7 new people

Customer Segments

Who do we serve?

- Users (free): BINUS students & friend groups of 4–8
- Payers: advertisers via ad network – games, apps, e-commerce
- Later: frequent hosts (CommonGround+)

Cost Structure

What does it cost to run?

- Development & hosting
- Data / API use
- Venue checks & updates
- Campus marketing

Lean build. Verified data.

Revenue Streams

How do we make money?

- Phase 1: free pilot, no ads
- Phase 2: in-app ads (CPM / CPC) on 2 screens only
- Phase 3: CommonGround+ for hosts, ~Rp15–25k / month
- Never food ads – picks stay neutral

Free for users. Ads first, subscription later.
